

## A seminar "Between physics and biology and medicine"

Department of Medical Physics and Department of Experimental Particle Physics and Applications  
M. Smoluchowski Institute of Physics of the Jagiellonian University

### „Multifaceted examination of human bone remains: fossil and current human using micro-CT”

dr Wioletta Nowaczewska

Department of Human Biology, University of Wrocław

#### About the Speaker:

Dr. Wioletta Nowaczewska from the Department of Human Biology collaborated scientifically with dr. Mateja Hajdinjak, who belongs to the team of this year's Nobel laureate in the field of physiology and medicine - prof. Svante Pääbo. These studies concerned the analysis of the mitochondrial DNA of Neanderthals discovered in Poland.

Date: 9 MARCH 2023, 2 pm

Place: B-2-50, FAIS, Łojasiewicza 11
